TOP10 Bossa Nova Chords

Essential Voicings for Guitar

01

**Cmaj⁷⁽⁹⁾****10 CATALOG ENTRIES**

Every chord is a movable shape — learn it once, play it in all 12 keys.

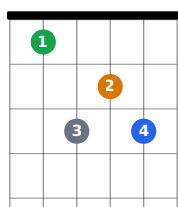

4 REAL SONGS

Every entry is cross-referenced to where it actually appears — Ipanema, Corcovado, Blue Bossa and more.

ROOT-INDEPENDENT

Every diagram shows the C-voicing. Learn the shape once, slide it to any root.

01

Cmaj⁷(9)

*The opening sound of Bossa Nova
— open, transparent, with that
signature floating Maj7 glow.*

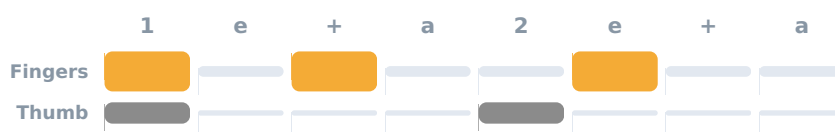

Der Maj7-Akkord mit None ist der Einstiegsklang der Bossa Nova. Das Drop-2-Voicing verteilt die Töne — Grundton, Terz, Septime und None — auf vier Saiten und klingt dabei offen und transparent. Die große Septime gibt dem Akkord seinen charakteristischen warmen, schwebenden Charakter.

Dieser Akkord steht gleich zu Beginn von „The Girl from Ipanema“ (FMaj7(9)) und ist damit wohl der berühmteste Bossa-Nova-Klang überhaupt. Tom Jobim nutzte ihn als tonales Zentrum in ruhigen, lichten Kompositionen — gespielt mit sanftem Daumenanschlag auf der Basssaite.

SUGGESTED PRACTICE PATTERN

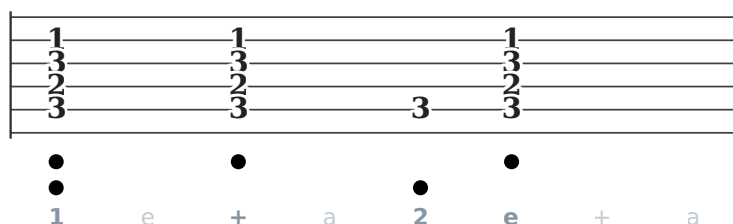

1 Tap your foot and clap the rhythm

Gilberto Rhythm · 2/4 · 87 bpm

2 Then apply it to the guitar in this style

Thumb (dark dot) plays the root on 1 & 2 · fingers (orange dot) pluck the chord on the off-beats

Cmaj⁷(9)

DROP 2

Movable shape
— root on the
5th string.

LISTEN

The Girl from Ipanema — Tom Jobim. The opening bars sit on this same open, floating Maj7(9)-family shape, just moved to a different root.

TRY THIS

Thumb softly on the bass note, fingers brushing the top strings on the off-beat — that's the Gilberto feel.

RELATED

Compare with the Shell Voicing of the same chord (*maj7-shell-roota*) — fewer notes, even more transparent.

REPERTOIRE EXAMPLE · 1 OF 4

The Girl from Ipanema

Bars 1-8 · Antônio Carlos Jobim
