Chords in Movable Forms

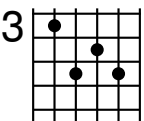

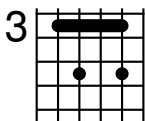

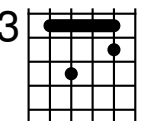

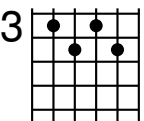

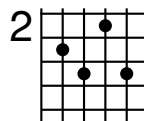

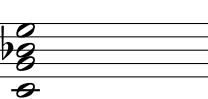

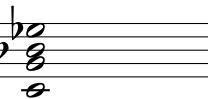

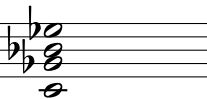

These Chord Forms represent some of the most famous Seventh Chords that are used on the guitar. Each Chord Form is written out in the five important qualities: **Major7**, **Minor7**, **Dominant7**, **Half Diminished** and **Diminished7**.

Here are the Chord Forms sorted by root note, starting with the low E-String. On the next page you will find some basic examples on how to practice these chords. The Chord Forms with the root note on the D-String are mostly used in Chord Melody playing and will be covered more in depth in another lesson.

BASIC SEVENTH CHORDS

Basic Practice Patterns

Major7-Chord | Root Note on A-String

These chords are very common. The following pattern is easy on the hands and also the beginning of the famous Bossa Nova song Dindi by Tom Jobim.

CMaj⁷ **B^bMaj⁷**

Minor7-Chord | Root Note on E- and A-String

In Bossa Nova, both Major7 and minor7 chords are often played with the nine as an extension tone. Nevertheless, there are many examples in which the basic chords are used. Such as this chord vamp, which is a simplified excerpt of Jorge Ben Jors introduction to "Chove Chuva" (Constant Rain).

Am⁷ **Dm⁷**

Major7-Chord | Root Note on E- and A-String

This is a good chord progression to practice both major chords. It is common in jazz standards such as Autumn Leaves or Fly me to the Moon, as well as Bossa Nova songs. This excerpt is taken from "Manha de Carnaval".
